ORGANIZATION

OF THE

CITY GOVERNMENT, JANUARY 1, 1900.

The Mayor and Council met at the council room at 7.30 o'clock in the afternoon on the first Monday of January, 1900.

The meeting was called to order by Mayor Daniell who administered the oath of office to Mayor-elect Rufus G. Burleigh and Councilmen-elect George S. French of ward one, Thomas F. Dwyer of ward two, and Willie L. Whittier of ward three.

MAYOR DANIELL'S VALEDICTORY.

Gentlemen of the City Council of 1899:

The closing administration has endeavored to conduct the business of the city of Franklin as a business enterprise, obtaining the most complete and efficient service at the least expense. It has reduced the debt by the largest amount in our history, improved our highways, extended our sewers, maintained our schools, made a beginning for a free public library, all at the old tax rate. By these—its fruits—it must be judged.

The $40,000 4 per cent bonds of 1885 have been refunded by new bonds at 3 1-2 per cent interest, $5,000 being payable each year, 1902 to 1909, inclusive, making a saving of $200 yearly on interest, and a premium of $669.20 was received for these bonds.

At present our highway machinery, rollers, plows, tools, lumber, drain pipe, etc., are kept—or rather not kept—and our horses stabled in scattering parcels over the city, with the inevitable resultant loss by weather and appropriation. Bearing this in mind, I strongly urge the securing of a centrally located lot where buildings suitable for the purpose may be erected to shelter city property.

In closing, I wish to acknowledge my appreciation of the kindness and courtesy received from all with whom I have had official relations. The incoming mayor and council have my best wishes for a harmonious and successful administration.

Mayor Burleigh then delivered his inaugural address as follows:

MAYOR BURLEIGH'S INAUGURAL.

Gentlemen of the City Council:

I fully appreciate the honor my fellow citizens have conferred on me by electing me mayor of the city of Franklin, and, in accepting the trust, pledge myself to administer the affairs of the city, so far as I have the ability and power, impartially and prudently. For the past five years our municipal affairs have been conducted so wisely that we can hardly hope to leave a better record. The administration just closed has demonstrated conclusively that with a tax rate of $18.50 per thousand we can appropriate sufficient money for the needs of all departments and have $10,000 left for permanent improvements or to apply on the debt. We

must conduct the financial affairs of the city as well as our predecessors, and, if any mistakes have been made, profit by the experience of the past. We owe:

Bonds of 1899,	$40,000
" Memorial hall,	30,000
" water works,	92,000
Franklin Savings bank note,	10,000

The bonds need give us no trouble this year. The floating debt of $10,000 should be paid before 1902. The first installment of $5,000 of the 1899 bonds becomes due in 1902 and must be paid.

SCHOOLS.

By the terms of our charter the general management and control of our public schools is in the hands of a board of education. When I consider the efficiency of our present board and the universal satisfaction it has given, it seems almost presumptuous in me to suggest any change for their consideration. We are expending, however, from $14,000 to $15,000 annually in support of schools, and we are asking our board of education to see that this money is wisely used and that a large number of teachers do their work honestly and well. It seems to me that we are asking too much of the board for the small salaries we pay them and that the recommendation of one of my predecessors should be adopted, viz., "That we elect a superintendent of instruction who shall devote his whole time to the schools." I would suggest that this recommendation be considered at a joint meeting of the board of education and the committee on schools.

ROADS.

We appropriate a large amount of money for roads and the taxpayers only ask that it be expended judiciously. Many of our citizens think that we should have

several highway commissioners, but in my opinion we shall obtain better results by throwing the whole responsibility on to one man than by dividing it among several. One highway commissioner, accountable to the council, should be appointed and made wholly responsible for the improvement and extension of our highways. He should be allowed to appoint, with the approval of the council, one or two assistants, but should not choose both of them from the same ward. It is a significant fact that the city of Dover, after trying a system somewhat like this, discarded it for two years and then adopted it again I am informed there are many highways in the city that are not used by the public. I would recommend that steps be taken for their discontinuance. During the past four years we have spent from $10,000 to $12,000 in macadamizing some of our principal business streets, and it seems to me the money has been wisely expended. But we must not forget our suburban fellow citizens who have a right to demand a part of our appropriation, and I would suggest that these taxpayers be given an opportunity to work with their teams in their immediate vicinity under proper supervision. By doing this we encourage local interest in good roads and save much time in travel. I recommend that paths for bicycles be built wherever advisable and practicable.

FIRE DEPARTMENT.

The fact that during the past year, although there have been many alarms, no serious conflagration has occurred speaks well for the promptness and efficiency of our fire department. For details and suggestions in regard to this department you are referred to the report of the chief engineer, whose good judgment we all appreciate.

WATER WORKS.

The report of the board of water commissioners gives complete information in regard to that department. The city has paid $3,680, the interest on water works bonds and received from water commissioners $3,295.22. The responsibility of the city council for management of water works begins and ends with the election of water commissioners. Elect good men who will not be indifferent to the trust we confide to them.

RULES.

That you may avoid the suspicion of acting hastily or from interested motives, I recommend the adoption of a rule requiring unanimous consent of the council for immediate action by that body on any new business involving the expenditure of money. Such business should be referred to the appropriate committee for investigation and report at a subsequent meeting of the council.

POLICE.

Good order and the enforcement of law are what all law-abiding citizens demand. We should give the department such support as may be necessary to secure the best results.

AUDITING.

In order that the accounts of the collector of taxes may be verified, I recommend that at the annual examination the auditor be required to notify persons, from whom taxes appear to be due, of the amount unpaid. By this means mistakes, or fraud, may be detected.

SUITS.

There are several suits pending against the city. The report of the city solicitor will explain their present condition.

STREET LIGHTS.

We are paying $3225 for street lights. The more compact part of the city is well supplied with lights. We should not add more until careful investigation shows that they are imperatively required. The location and care of lights has usually been left to the highway committee. The committee work will be more equally divided among the councilmen by having a standing committee for this purpose. Therefore, I would recommend that the council authorize the appointment of a standing committee on street lights.

TRUST FUNDS.

The public statutes of New Hampshire provide that the towns may hold in trust funds for the care of cemeteries or lots therein and shall pay 3 1-2 per cent interest on the same, also that such funds shall be expended in accordance with the terms by which said trust is held. This statute not only enables a person, who cannot give the necessary attention to the duty, to provide for the care of cemeteries or lots during the person's life time, but also to make sure that the cemetery or lot will never be neglected. It is said good results from this legislation are already apparent and many graves that have been neglected are now systematically cared for. This city has already accepted one trust in the bequest of Mrs. Hannah Hale Sawyer for the benefit of the Hale lot in the Webster Place cemetery. In time

the city council will undoubtedly appoint a committee to see that the income from these funds is properly expended.

CLOSING.

To us has been committed the management of municipal affairs for the ensuing year and we are individually responsible for all the measures passed by the city council unless we protest against them by our votes. I hope every councilman will express an unbiased opinion upon every question coming before us and that we shall be prompted by our better judgment to act without partiality or prejudice. I have been very pleasantly associated with some of you in the city council and trust that in the future, as in the past, our deliberations may be harmonious, and beneficial to this thriving city at the head of the Merrimack, where most of us have spent all our lives, and whose growth and prosperity we all desire.

Dec. 16, false alarm. Department responded but could locate no fire.

I herewith make the following recommendations for the year of 1901:

1st.—That the city purchase not less than one thousand feet of new hose, as a great portion of the hose in use is unfit.

2nd.—That, owing to the International Paper Co.'s inadequate facility, and objection to furnishing horses for the apparatus, we recommend that the city arrange to keep the city horses in the same building with the apparatus.

3rd.—On account of the incapacity of the hook and ladder truck we recommend that a more modern truck be furnished whereby the extension ladder and other equipments which appertain to the saving of human life and property can be carried to a fire at the first alarm.

4th.—That the city pay for telephone at the central station and Hose No. 1 house from Jan. 1, 1901.

REMARKS.

In the past year the city has had 5 still alarms and 20 bell alarms, one of which was false. This breaks the record for number of fires and loss of any previous year for the city. The department which is composed of volunteers, we think, is second to no volunteer department in the state; and with the additions which we recommend, would be of such efficiency, that the city could be proud of, and safe. We wish to thank the members of the department for the prompt and united efforts which they have rendered for the past year. We also thank the police department for the assistance which was given at every fire and at all times.

Respectfully submitted,

J. E. GALNETT, *Chief.*

BOARD OF HEALTH.

REPORT.

During the past year there has been reported to this board two hundred and five cases of contagious diseases. Of these there were three cases of typhoid fever, four of membraneous croup, seven of scarlet fever, twenty-one of diphtheria and one hundred and sixty-four cases of measles. Out of this number of cases there were nine deaths, as follows: Diphtheria, three cases, membraneous croup, two, measles, two, and typhoid fever, two cases. Thirty houses have been thoroughly fumigated, the formaldehyde spray together with the sealing papers being used in twenty-eight cases and sulphur in the other two. In order to comply strictly with the state laws and instructions from the state secretary of the state board of health the local board has found it necessary to expend the rather large sum of seven hundred and eighty dollars and eight cents during the past year. This money has been used in purchasing supplies for fumigating and giving aid required by law to those quarantined with contagious diseases.

This board has tried to be as economical as possible but many cases required aid for a somewhat extended length of time. There were others whose circumstances demanded more liberal aid than is generally given.

The winter of 1899-1900 found Franklin involved in an epidemic of measles which this board was powerless to prevent when it assumed control of its work. Although we have the record of only one hundred and sixty-four cases of measles there were probably three hundred cases in all.

We have endeavored to attend to all nuisances and have them abated as soon as possible. In this connection five legal notices have been served and numerous personal letters sent out. In all cases, so far as we know, they have been complied with immediately.

During the year through the efforts of this board practically a complete set of books have been obtained for properly keeping the records of this department. Weekly and monthly reports have been regularly forwarded to Concord and Washington and all other clerical work properly attended to.

We wish to express our thanks to the physicians and all others who have aided us in any way in our work during the past year.

Respectfully submitted,

HARRY E. MYGATT, *Secretary.*

CITY SOLICITOR.

REPORT.

To the Mayor and Council:

I herewith submit to you the situation of the litigation in which the city has been interested during the year.

The case of Mary J. Hinckley has been partially tried before the county commissioners and February 1st, next, has been set for the completion of the hearing.

The action of Jacob B. Dole has been settled. The city by the settlement has secured deeds and a written agreement from the adjoining owners as to surface water crossing their lands which is expected will avoid future controversy or claims for damage.

The action of Frederick Flanders has likewise been settled. The supreme court ordered a new trial to find further facts which were not clear from the referee's report. A settlement was made for about what it would have cost for another trial. The amount paid in each case is shown in the city report.

The petition of Hannah Welch for leave to bring suit was tried before Judge Chase who ruled that the plank sidewalk at the foot of Prospect street was a bridge within the meaning of the statute and granted leave to bring suit. The city took an exception to the ruling and the case will be decided in March. If the court sustains the ruling that this walk is a bridge the

plaintiff will then bring a suit, and, considering the amount of travel and the chance for future claims, in my judgment it would be economy for the city to replace this by a raised concrete sidewalk and thus avoid future claims of this character.

The case of the city against Frank M. Edmunds has been referred to the county commissioners but has not yet been tried.

A suit has been brought against the city during the year in favor of Danforth & Forrest for a balance claimed to be due in construction of the city hall. The justice of the claim is denied by the building committee who claim a full settlement, and the suit will be contested.

A suit in equity was commenced in November by the city against John Durgee and Henry Herbert to establish the right to have surface water flow over their land from the highway or to acquire that right if it did not exist. It is expected that some satisfactory arrangement may be effected in the spring between the parties.

COMMENTS.

Although the record of one school year apparently differs but little from that of another, still there is always more or less evidence of changing conditions.

The statistics for the school year ending in June show an enrolment of 780 pupils. 363 are enrolled in the Falls schools, 102 in the high school, 192 in the Nesmith school, 112 in the ungraded schools.

The school census shows the result of the regular census for 1900 and is the most satisfactory we have ever been able to secure. The number reported as not attending school in April is somewhat appalling, but it does not necessarily imply that a part of them at least have not attended school at all during the year. Truancy is a growing evil in our city and manufacturers who seek to evade the law against employing children of school age, are in a large measure responsible for it. Recent legislation makes the penalty both for parents who allow their children to stay out of school and for those who profit by their labor, severe. We have difficulty in securing an officer willing to make himself in any way responsible for truants or child laborers.

The prevalence of measles and scarlet fever last winter had a marked effect on the attendance and an epidemic of whooping cough seems likely to have the same effect this year.

The enrolment shows no material increase in numbers in the Falls schools.

Grades VIII and IX, which were last year combined as grades VII and VIII, are this year seated together in charge of Miss Greeley. The number of pupils in the succeeding grades will not permit this arrangement another year.

As usual the primary grades show the largest enrolment. With few exceptions the pupils in the first grade have had the kindergarten training, and the teachers report that those who have not had the training invariably fall behind the others. When there is a decided objection on the part of the parents to the kindergarten, we do not wish to make it compulsory, but in view of the fact that the primary work almost demands it, we wish to emphasize the advantages which this training gives to the child. There is a large kindergarten class of children four years of age.

We begin the year with a new high school principal, Mr. Leslie L. Cleveland, a graduate of Williams college. Mr. Cleveland has won high success in the position he has held previous to his coming to Franklin and we feel sure that he will bring our high school up to the high standard he has been accustomed to elsewhere. He expresses his own views of the ideal high school in the following words:

The work in the high school this year has been conducted with two objects in view—to secure a high standard of scholarship and to inspire in the students a love for careful work. Courses of study must necessarily be but one of the means by which we accomplish these ends. To cram a young mind with facts is not educating it. Even the brightest and most faithful will retain such information but a short time. The mind must be trained so as to become the invaluable instrument it should become in later life. The training is largely a failure that has not taught the pupil to do careful, accurate work, and, still more, to be dissatisfied with any other kind. With this thought in mind, and believing that certain studies are more conducive to such a result than others, some changes have been made in the curriculum.

The principal one is in English. It is our desire to arrange a course in this subject which every member of the school must take.

We can lay small claim to an education if we do not possess a good working knowledge of our own language.

No student should be graduated from our high school who is unable to write good English and has not some acquaintance with the standard English and American writers. We would also like to urge upon the citizens and especially upon the alumni a more active, aggressive interest in this school of theirs. Only with such assistance is it possible to bring the school to the position it ought to occupy.

Mrs. Ellen E. Webster has been engaged to teach a part of each day in the high school and also to take charge of the nature study in the lower grades. The other assistants are the same as last year.

Unfortunately the Nesmith schoolhouse does not adapt itself readily to the increasing number of pupils nor does the style of architecture lend itself readily to any plan of remodelling. The addition of one room two years ago and the securing of a kindergarten room outside have bridged over the difficulty of crowded quarters for a time.

In arranging the work for the present year, we found that the large class comprising grade I. could not possibly be combined with any other grade. In order, therefore, to make room for all the grades, Mr. March, the principal, has four grades seated in his room. Miss Closson has entire charge of two of these grades in recitations, making use of the small recitation room. This arrangement is far from satisfactory from a hygienic point of view. It also makes the special instruction in music and drawing difficult.

It gives us pleasure to commend the good grace with which the teachers have adapted themselves to the situation. Only the most perfect system and order could make this arrangement possible. The board is not now ready to suggest a practical plan for the solution of this puzzling problem. We are glad, however, to report the excellent condition of the schools in spite of the difficulties.

During the past fall term the pupils from the Call have been conveyed to the Simonds school.

Changes in the Shaw Corner neighborhood leave only two or three scholars for that school and arrangements have been made to bring them to the Nesmith school.

It is perhaps superfluous to repeat what has been so often said in our yearly report in regard to a superintendent for our schools.

Immediately following the consolidation of Franklin's school districts into one district we took front rank among the schools of the state. Subsequently the law was passed abolishing all districts, not especially established by statute, and each town was made to constitute one district. Franklin still held her place at or near the front rank, not only among the towns but with the cities. This was true of schools throughout New England as well as New Hampshire. The scholars of Franklin were as far advanced and as thoroughly prepared as were any students of like age in this state or Massachusests, and better than those of Maine and Vermont. The schools of Massachusetts took a long step forward when her legislators made it possible for the smaller places to employ a man who should give his whole time to school supervision. Laws similar to those of Massachusetts were passed at the last session of our legislature and all towns under $2,000,000 valuation can receive state aid toward paying a school superintendent. Last spring the Board attempted to make an arrangement with Tilton and Northfield to unite with Franklin for this purpose. The attempt was not successful. The question now is: Shall we employ a superintendent even if we fail to interest any nearby town to unite with us? If we wish to keep the efficiency of our schools equal to or better than other schools we must answer this question affirmatively. Times have changed and what was good enough for our fathers is not good enough for our children. We have given much thought to this matter and unanimously recommend the district to employ a school superintendent.

The new Morrison schoolhouse is well under way. It is located near the center of a section which takes a point near the Cate brook for the southern boundary and the town line for the northern boundary. It has been thought best to build a house somewhat better than those usually used for ungraded schools, as the prospect is good for a large school here in the future, there being nearly fifty houses and upwards of thirty children in the section assigned for this school.

Be it ordained by the City Council of the City of Franklin as follows:

SECTION 1. That the resolution of the City Council adopted May 10, 1895, relating to sewers, be and the same hereby is so far modified as to provide for a special assessment or charge only on such persons or corporations as have already, or may hereafter, connect with the new system of sewerage.

SEC. 2. That no person or corporation shall be required to connect with any sewer except by direction of the Board of Health of the city or the City Council.

SEC. 3. All persons who have already, or shall hereafter connect with the new system of sewerage, shall pay to the city the following sums, to wit: For each tenement of seven rooms or less, fifteen dollars, for each additional room in a tenement in excess of seven, two dollars.

Space in buildings occupied wholly or in part for stores, manufacturing, or other purposes than private barns, cellars and store houses or store rooms, or outbuildings, shall be reckoned and paid for on the basis of one hundred and fifty square feet of floor space as one room when connected with the sewer.

SEC. 4. All persons who have already connected with the new system of sewerage shall pay to the City

Clerk the amounts for which they are liable under the provisions of Section three within thirty days after the passage of this ordinance, with interest thereafter, and the City Clerk is hereby directed to collect the same.

SEC. 5. No person shall hereafter connect with any public sewer without first obtaining a permit therefor signed by the City Clerk and countersigned by the Highway Agent, and before such permit is issued to connect with the new system of sewerage such person shall pay to the City Clerk the sums for which he would be liable under the provisions of Section three.

SEC. 6. In any case where connection with a sewer is made by the Board of Health, through the neglect or refusal of the owner to comply with their orders so to do, the amount provided to be paid therefor in Section three shall become at once due and payable and collected by the City Clerk, but the City Clerk may issue a permit in such cases without prepayment.

SEC. 7. Every permit to connect with any public sewer issued by the City Clerk shall contain the name of the owner, the number of tenements and rooms in each for which the permit is granted, the location of the tenements and amount paid for such permit, a record of which shall be made by the City Clerk in a book kept for that purpose.

SEC. 8. All connections with any public sewer shall hereafter be made under the supervision of the Highway Agent and in accordance with his directions, and it is hereby made the duty of the Highway Agent to see that all such connections are securely made and in the safest and best manner, and that only proper pipe and other materials are used.

SEC. 9. No person or corporation shall deposit any garbage, offal, filth or any substance having a tendency to obstruct the flow of sewage in any manhole, flush tank or sewer opening.

SEC. 10. All fixtures connected with private sewers leading to the public sewers shall be provide with

suitable traps and strainers to prevent the introduction of all solids or anything that would obstruct the flow in the pipes.

SEC. 11. Any person violating the provisions of Sections five and eight, nine and ten of this ordinance shall be fined not exceeding twenty dollars.

SEC. 12. This ordinance shall take effect upon its passage.
